U3A began in France (where it was known as the University of the Third Age) over 30 years ago and is now worldwide with many thousands of members.

U3A was launched in New Zealand in 1989.

A University of the Third Age is a learning co-operative of older people, which enables members to share many educational, creative and leisure activities.

There are many enjoyable social and interesting things to do, and many people to share that experience with.
