

Lawns to Legumes Workshop

Hosted by **Blue Thumb** in partnership with **University of MN Extension** and **Stearns County Extension Master Gardeners**

Saturday, April 18, 2020

9:00 a.m. - Noon

**Workshop will be presented
Live Online***

*Participants must pre-register for the event to receive the link to the online presentation.

Link will be emailed to participants the day before the workshop.

“ Pollinator conservation can be as simple as allowing clover to bloom within your lawn, or planting a few native perennials ”

Why Should I Attend?

Minnesota is home to more than 450 native bee species, as well as other pollinators such as butterflies and moths. Learn about the four supported planting types: native pocket plantings, pollinator-beneficial trees and shrubs, pollinator lawns, and pollinator meadows.

All residents will receive one-on-one site assessments and planting recommendations from a Lawns to Legumes coach or Landscape Designer.

Attendees will receive practical information about installing projects, including available cost-share programs and Blue Thumb resources to help get a project in the ground.

How to Register

Visit www.bluethumb.org/events

Call Stearns Extension at **320-255-6169**

There is no cost to attend workshop

What is Lawn to Legumes

A program focused on providing residents education and financial assistance to convert areas of their lawns to pollinator-friendly habitat in order to slow and reverse the decline of Rusty Patched Bumble Bee populations and other at-risk pollinators.
