

Better Health and Care: developing a plan for north east London

The Better Health and Care Plan looks at how services can improve and continue in future

For the NHS to meet the needs of future patients in a sustainable way, they need to close the gaps in health, finance and quality of care between where they are now and where they need to be in 2020/21.

Changes must be made to the way care is delivered to create a better future for the NHS. This doesn't mean doing less for patients or reducing the quality of care provided. It means more preventative care; finding new ways to meet people's needs; and identifying ways to do things more efficiently.

Come and have your say on how we can:

- Deliver the right services in the right places
- Change the way health and social care is provided
- Work together to secure the future of local services
- Improve specialist care; creating shorter waiting times
- Better manage our buildings

when: Tuesday 7 February 10:30-12:30pm

where: Stratford Circus Centre, Theatre Square, E15 1BX
